Product Description

Turftime Equipment AA-9600S 7' Advantage Aerator

Did you know that regular aeration can improve turf health by up to 75%? As the demands for lush, vibrant lawns and fields grow, so does the need for efficient and innovative turf maintenance solutions.

At Turftime Equipment, we understand the significance of investing in quality aerating equipment. That's why we've engineered our Advantage Turf Aerators to deliver unparalleled performance, efficiency, and versatility. Whether you're a sports field manager, golf course superintendent, or homeowner looking to elevate your lawn care routine, our turf aerators for sale are the ultimate solution for achieving superior results.

Heavy Duty Aerators for Sale: Choose Quality, Choose Results

Investing in high-quality aerating equipment is essential for maintaining a healthy lawn. **The heavy duty aerators for sale at Turftime Equipment handle a large percentage of the workload of a deep tine aerator for much less money and do the job in much less time.**

Because our heavy duty aerator for sale boasts lower costs and faster operation compared to traditional deep tine aerators, you unlock the opportunity to aerate your lawn every two to three weeks. Unlike deep tine PTO driven aerators, which many facilities can only afford once a year due to budget constraints, the ability to aerate more frequently with Advantage Aerators ensures a healthier turf and safer field year-round.

Utilizing different types of tines in aerating equipment enhances effectiveness by catering to various soil conditions and turf needs.

- **Standard Sport Tines:** Our versatile Advantage Aerator comes with standard proprietary revolution chisel point sports tines. These tines allow you to aerate your turf up to 7.5 inches deep, ensuring thorough soil penetration for peak root development and nutrient absorption.
- **Optional Fine Tines:** Elevate your aeration game with our optional fine tines crafted for golf greens. With this type of tine, you can aerate your greens up to a depth of 6.5 inches, catering to the unique demands of maintaining pristine golfing surfaces.
- **Optional Core Spoons:** Explore enhanced aeration capabilities with our optional core spoons, specially designed for the Advantage Aerator. These innovative attachments facilitate core aeration, allowing for

the extraction of soil plugs to alleviate compaction and promote healthier turf growth.

Our different types of tines are interchangeable on the standard axle, however, you could also invest in an extra rotor and switch from a slicing aerator to a coring aerator in a matter of minutes!

This versatility in tine selection ensures tailored aeration solutions, optimizing the health and resilience of your turf, making TurfTime Equipment's Advantage Aerator the best value for multi-purpose use.

Standard Features

- Steel "Chisel Point Sports" tines 7.5 in. cut x 3/8 in. thick
- Four tines per wheel
- Tine wheels are on 6 in. centers
- Heavy duty greasable bearings on each end of axle shaft
