Product Description

Turftime Equipment Premium Dethatchers

If your goal is a healthier lawn, then dethatching should be one of your top practices.

Thatch is known as the build-up of living and dead organisms that forms between grass blades and the soil surface. While some thatch is good for your lawn, too much can cause serious drainage, pest, and moisture problems.

With a tractor PTO driven dethatcher like the ThatchMaster, you're guaranteed a healthier golf course, athletic field, turf, or lawn! By using powerful Verticutter metal blades and adjustable depths for combing, **a dethatcher for sale pulls thatch to the surface so it can be bagged or turned into compost.** Pair any of our dethatchers for sale with a high-quality commercial aerator for to create a true expert-level lawn care routine.

Get more information about our dethatchers for sale, how to use them or where to buy when you contact us today!

How Our Grass Detachers Promote a Healthier Lawn

Grass dethatchers do so much more than just remove the layer of build-up on your lawn. The tractor PTO driven verticutters for sale at Turftime Equipment also help:

- Circulate air deep down into the roots
- Provide necessary carbon dioxide for growth
- Stimulate existing roots while encouraging new root growth
- Increase effectiveness of fertilizer
- Improve draining
- Promote a healthier, greener lawn
