

Barreto Trencher Model 13STKH

The Barreto [13STKH](#) is a 1,085 lb. walk-behind, track-driven trencher featuring a 13 HP Honda GX390 engine, designed for digging trenches 24-30 inches deep. It features an independent floating track system for improved traction and stability on uneven terrain. The 13STKH utilizes an Adjustable Trenching Control (ATC) system that manages track speed for easier steering and efficient trenching in tough soil.
